Wood Design & Building magazine is pleased to announce the recipients of the 2014 Wood Design Awards. A jury panel selected 20 winning projects, including four international entries, from 166 submissions. The Wood Design Awards is the only North American program that recognizes achievements in wood architecture every year.

With a nod to the caliber of entries, the panel of three judges repeatedly commended all of the entrants throughout the judging process. All projects demonstrated a commitment to architectural excellence in wood. Special awards will also be granted by the Canadian Wood Council as well as this year's award sponsors, Sustainable Forestry Initiative (SFI) and Real Cedar. Those winners were not available at magazine press time. Check www.cwc.ca for the most up-to-date listing.

In partnership with the Canadian Wood Council, *Wood Design & Building* would like to thank everyone who participated in the 2014 Wood Design Awards program. A special thank you is also extended to SFI, Real Cedar, as well as our esteemed jurors. Congratulations to our winners! 🏆

INTERNATIONAL HONOR
